1. The following is an examiner's statement of reasons for allowance: Applicants show combination therapy and a method for treating acute pain wherein an anti-epileptic compound and an NMDA receptor antagonist are utilized. The compounds are known. Caruso et al US 6,187,338 B1, considered the closest prior art of record, shows anti-epileptic/anticonvulsant compounds combined with NMDA receptor antagonist and an analgesic for treating pain. The prior art does not show nor fairly suggest applicants' particular combination of anti-epileptic compound, in particular pregabalin, and an NMDA receptor antagonist used in a method for treating pain.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 42-45 and 49-54 are allowed.

Claims 1-41, and 46-48 have been canceled.
